

## HINDI BATON CAP

*The Ultimate Grip in Baton Retention*

APPROVED BY L.A.P.D.

TESTED AND PROVEN to be the safest, most effective baton accessory to date. The advantages of the Hindi Baton Cap are unparalleled and come highly endorsed and recommended by numerous police agencies "top" trainers and "use of force" experts both nationally and internationally.

### 30 "NEW" TACTICAL ADVANTAGES AND SAFETY FEATURES FOR AUTOLOCK AND FRICTION LOCK BATONS

#### THE DRAW

- Provides your hand with a quicker way to identify and locate your baton while still in the holder
- Provides a safer, more reliable baton grip from slippage or loss during the draw
- Provides a faster, more comfortable draw in any situation from any style holder or gun belt position
- Provides better grip control after the draw, just before expanding the baton
- Provides maximum retention, preventing baton loss during the momentum of the baton expanding open

Note: The Hindi Baton Cap and the Monadnock Front Draw™ swivel holder were tested and proven to be the safest and most effective baton combination in law enforcement today:

- A two – three times faster draw in any situation
- Easier accessibility in drawing the baton with either hand during standing/ground fighting situations
- Eliminates hazards of reaching behind or back-peddling toward unknown objects to draw the baton
- Allows for three optional strikes from the support side (reverse/forward strike, front jab)
- Built in retention clip guards your baton from falling out or expanding in physical altercations

#### ADVANTAGES DURING PHYSICAL ALTERCATIONS

Your hand positioned securely against the Hindi Baton Cap provides the following:

- Maximum striking power and increased leverage
- Unsurpassed grip retention during the momentum of a baton swing or force of impact
- Added length to your baton eliminating the "standard method of choking up" on the baton handle
- More consistency in striking distance and target accuracy
- Blocks against deliberate suspect take-a-ways
- Increases your proficiency and confidence in the use of your baton

#### INCLEMENT WEATHER, SWEAT, STRESS CONDITIONS

These conditions adversely affect your ability to use your hands quickly and effectively during volatile situations and will magnify the potential for baton loss. *The Hindi Baton Cap effectively addresses ALL these concerns.*

#### SAFER, MORE EFFECTIVE STRIKING CAPACITY

- Larger surface area produces a greater energy transfer for maximum striking effectiveness
- The smooth, round surface will not penetrate, rip or tear the skin
- Safer to the suspect without limiting your use of force response
- Provides a safer, more effective striking alternative in the escalation or de-escalation of force

**BUT WAIT . . . THAT'S NOT ALL!**

## SAFETY CONCERNS OF A DROPPED BATON ROLLING AWAY

A baton with a Hindi Baton Cap will roll in a circumference "staying in a closer proximity to you" even if dropped in uneven surfaces.

## IDENTIFY THE GRIP END vs. STRIKING END

The Hindi Baton Cap provides you with a touch (or visual) identifier for establishing a correct grip from the ground pickup in all lighting conditions or terrain.

## EASIER BATON PICKUP FROM THE GROUND

The Hindi Baton Cap provides a raised end that allows your fingers more clearance for an easier, faster pickup off the ground.

## ATTENTION ADMINISTRATORS OR RISK MANAGERS – FOR YOUR CONSIDERATION

*"What do we as administrators want from our batons?"*

- *Reduced liability for officers, supervisors and administrators alike*
- *Enhanced officer safety and performance*
- *Non-aggressive appearance, reliability and control*
- *Low purchase cost due to budget constraints*

*... I have found that the Hindi Baton Cap provides all these qualifications."*

**Ed Nowicki, (30+ yrs.) law enforcement training  
Co-Founder and Executive Director of ASLET**

*"I predict that this end cap will revolutionize the tactical baton and will finally make it a device fully accepted into the mainstream of law enforcement. It provides the last technical improvement to fully convince officers to come to grips with the technology of the future . . . I truly believe that every officer in America who possesses this type of tactical baton should equip himself or herself with one of these end caps."*

**Bob Willis, (20+ yrs.), Lead Instructor/Litigation Consultant  
Calibre Press – "Street Survival" seminars**

The Hindi Baton Cap does not change the functionality of the baton and does not change department certified training techniques—it only enhances safety, proficiency and confidence in baton usage, something never before available to officers who use a friction lock baton. The Hindi Baton Cap makes the currently used expandable friction lock baton a more efficient impact tool to date.

HINDI BATON CAPS	
<i>Part ID</i>	<i>For Model</i>
6210	For Monadnock Classic Friction Lock Batons
